PROFILE

MBO Software Development student (niveau 4) at Mediacollege Amsterdam, seeking a 6-month full-stack internship from December 2026. I build and ship real, deployed products across the stack — React and TypeScript on the front, Node, Python and Laravel behind it — and use AI-assisted workflows to move from idea to production fast. Comfortable with authentication, databases, REST APIs and live deployments.

SKILLS

- Languages** TypeScript, JavaScript, Python, PHP, SQL
- Frontend** React, Next.js, Tailwind CSS, Vite, HTML & CSS
- Backend** Node.js / Express, Laravel, Python (aiogram, SQLAlchemy), REST, JWT & CSRF auth
- Data** SQLite, MySQL, SQLAlchemy, schema design & migrations
- Tooling** Git & GitHub, Vercel, Railway, Netlify, Vitest / Playwright, AI-assisted dev (Claude Code)

PROJECTS

- AI Helper SD** — educational AI tutor Live · Source
AI chat assistant for Software Development students with four teaching modes (Explain, Debug, Step-by-step, Code Review). httpOnly JWT + CSRF auth, streamed responses, closed beta capped at 10 users. React · Express · Groq LLM · SQLite
- NApuff Bot** — multi-language commerce bot t.me/NApuff_bot
Telegram shop bot (EN/RU/UK/NL): category → brand → model catalog, cart, and checkout with delivery or pickup, routing live orders to admin chats. Async architecture, self-migrating SQLite, money handled as integer cents. Python · aiogram · SQLAlchemy (async) · Railway
- YouTube Shorts Automation** — video pipeline Personal project
Automated pipeline turning long videos into vertical Shorts: AI-selected viral moment, 9:16 blur-pad framing, word-level captions, branded outro, plus competitor monitoring. Python · ffmpeg · faster-whisper · Anthropic & YouTube APIs
- Personal Portfolio** — yevhent.com yevhent.com
Interactive, accessible single-page portfolio: reduced-motion support, keyboard navigation, dynamic Open Graph image, statically rendered on Vercel. Next.js 16 · React 19 · Tailwind 4 · framer-motion
